

Information on the event

Finspiration 2018

Finspiration from the Start-up Nation

It is our pleasure to invite you to Finspiration, our fintech conference taking place in Prague on 12 November 2018. You can look forward to a fast-paced event showcasing presentations by selected Israeli fintechs and offering plenty of opportunity for structured as well as informal networking with potential investors.

Israel has attracted, per capita, over twice as much venture capital investment as the US and 30x more than Europe. Come and see the energy propelling the famed Start-Up Nation first hand. You can look forward to presentations by selected Israeli fintechs and plenty of opportunities for structured as well as informal networking.

Let us introduce you to the participating fintech companies and our detailed programme.

[PayKey](#)

Redefining customer experience in banking, PayKey is transforming keyboard into a fully digital customer experience, increasing customer status, engagement and thus loyalty.

[REACH](#)

Digital customer platform supporting any device enabling audio/video remote interactions, real time document collaboration, e-signatures, processing automation through API's, linking backend to frontend systems.

[Covercy](#)

By merging experience-based innovation with technology and transparency Covercy created a secure, simple and cost-efficient cross-border payment platform together with terra, a tool ideal for investment professionals.

[Binah](#)

Binah's augmented, automated data-science engine offers answers and solutions for critical operational challenges using AI, Deep & Machine Learning and signal processing.

[Personetics](#)

Specialized in banking, Personetics presents a unique cognitive application framework using AI, Predictive analytics, Machine Learning and Natural Language to deliver a personalized experience for customers.

[Verifyoo](#)

Verifyoo offers the BehaviorMetric Protection Suite, an end-to-end solution for basic login, account recovery, and fraud prevention. By users' interaction with their mobile devices Verifyoo is analyzing the data collected from the phone's sensors using machine learning techniques.

[Atidot](#)

Atidot is an Israeli InsurTech startup building the first ever data cloud that understands insurance. Their solution provides life insurance companies with a way to get more from their data, improve business decision making and become more profitable.
