

Information on the event

Book launch: Data and Analytics for the 21st Century

Come to celebrating the launch of a new book – Data and Analytics for the 21st Century.

The five-volume publication is based on more than two decades of professional experience combined with information obtained through meticulous study of recent materials and writings. The book will teach you about the latest trends, walk you through current “megaproblems” and ways to deal with them, and provide you with dozens of specific, real-life examples. The largest volume is dedicated to modern approaches to architecture and governance. I believe you might recognize yourself in many parts of the book.

Programme:

- 5:00 pm Welcome drink
- 5:30 pm Book launch (Jan Pour, Zdeněk Tůma)
- 5:40 pm Casual chat and discussion

Please RSVP **by 22 November 2018.**

If you have any questions, please contact Ms. [Jana Záveská](#).
